How To Play Knockout

- **STEP 1:** Each player will be randomly put in a set order with the other people participating in the game. Once the order is designated, it only changes when someone is knocked out.
- **STEP 2:** Players will line up single file, in order, with the first person at the free-throw line. (basket will be lowered and closer line established for younger players)
- **STEP 3:** Basketballs will be handed to the first two players in line.
- **STEP 4:** The first person is allowed to shoot. If the shot is made, the player tosses the ball to the third player in line. If the shot is missed, the player must immediately try to rebound and score before the following player shoots a free throw or the player is knocked out of the game.
- **STEP 5:** Understand that if the second player also misses, that player must try to rebound and score before the first player rebounds, scores and quickly passes the ball to the third player waiting at the free-throw line, or the second player risks being knocked out.
- **STEP 6:** Note that play stops momentarily when a player is knocked out, and basketballs are again given to the next two players in line.
- **STEP 7:** Play will continue until one player remains, he or she is the winner.
